CUES CATVS

Combined Analog TV & Sonar

CATVS on a CUES Steerable Mudmaster

CATVS on a CUES Steerable Pipe Ranger

CATVS Installed on a Single Rack in the Control Room

The CUES CATVS system is a TV & sonar sewer and storm inspection system that transmits both video and sonar on a single multi-conductor cable. This system is designed to work with the OZII camera and Marine Electronics Sonar using a standard CUES gold cable. It can be adapted to multiple CUES platforms including: TV/Sonar Float, Sonar-only Float, Steerable and Non-steerable Pipe Ranger transporters, and the Mudmaster transporter. CATVS is Ideal for partially and fully-charged pipelines, including difficult-to-inspect siphons. [Contact CUES today for a free demo!](#)
