

C550c Hunter

Base Station

The CUES C550c Hunter is mounted in a compact and rugged weatherproof enclosure that can fit into an ATV, van, or pickup truck to access easements and hard-to-reach areas.

Featuring the C550c controller, the Hunter is designed around the user, helping you to create survey reports more easily and efficiently. With a wide variety of manual and advanced powered drum options, wide choice of wheels, elevators and tires allow you to inspect pipes from relined 6" all the way up to 60".

On the HUNT for a portable inspection system for hard-to-reach areas?

- Sealed front door is hinged, supported by a gas shock, and functions as an awning in the open position.
- Compact, rugged, weatherproof enclosure: can fit into a pickup truck, ATV, trailer or van.
- Intuitive menus and dedicated function buttons guide you through your survey, allowing you to move to the next job more quickly.
- The C550C controller with built-in rechargeable battery and rugged IP55-rated case provide reliability and usability in most challenging environments.
- The C550c incorporates reporting templates to comply with multiple standards. Reports are available to share as soon as you have completed your survey.
- GraniteNet compatibility helps you manage tasks, perform inspections and make informed decisions about the condition of assets.

Select either a cost-effective manual cable drum or an advanced powered drum - each with up to 1000ft cable.

Three interchangeable cameras & two powerful crawlers are designed to withstand the most challenging sub-surface conditions.

A wide choice of wheels, elevators and tires optimize your inspection needs enabling you to inspect pipes from relined 6" - 60".

CUES C550c is also compatible with range of pushrod cameras, adding pipes as small as 1 1/2" to your capabilities.
